A Bright Solution To A Dark Old Problem

Affordable Translucent Walkway and Canopy Systems

CPI walkway and canopy covers are a bright solution to the problems inherent in metal walkway covers – dark and unpleasant industrial appearance, “closed-in” feeling, and constant maintenance requirements. CPI walkway and canopy covers present attractive and affordable systems without the high costs and safety concerns associated with glass, acrylic or fiberglass systems.

CPI walkway and canopy covers provide an excellent shelter and support the walkway's design, giving an open air feeling by allowing the natural daylight to come through and light up the area below. One major disadvantage of a metal canopy is that it is opaque and blocks light, darkening the area below and the adjacent windows. CPI offers a translucent design alternative that lets in light.

Key Benefits of CPI Translucent Systems:

- Soft Diffused Light – No Glare
- Durable – Proven System Longevity
- Economical Design – Build Solutions
- Maintenance-Free

Pentaglas® Systems are made with Nano-Cell® technology, the latest and most advanced system for architectural daylighting applications. CPI Daylighting products ensure that your building envelope is covered by a daylighting system that provides unequalled durability and life safety performance.

WHAT IS NANO-CELL® TECHNOLOGY?

Standard Polycarbonate Sheet

Pentaglas® System

- Nano-Cell® technology provides precision engineered extrusions with cell sizes smaller than 0.18”, up to ten times more cell structure than standard wide cell panels!
- Like a roof with smaller spans between truss supports, the Nano-Cell® panel provides superior long term performance.

Code Compliance—Meets ICC requirements for CC1 approved light transmitting materials along with many other approvals.

Hurricane Endurance Designs—Special design complies with South FL / Dade Cty codes for Hurricane Conditions – NOA #05-1207.01

ID 24565 – Hyatt Place Hotel, Lexington, KY

Custom CPI Single Slope system accents contemporary canopy design
Architect: Bristol Group

ID 1453 – Miami Children's Hospital, FL

Self-supporting aluminum structure with Pentaglas® 16 hurricane endurance glazing system, per South FL Building Code
Architect: Maspons, Goicouria, Estevez, Inc

ID 25671 – NE Methodist Hospital, Live Oak, TX
CPI Clearspan Walkway includes structure from the ground up
Architect: Skanska
